

Mini Assessment

Simple Chatbot

Name	M.Mariselvi
Reg.no	99230041094
Department	CSE
Date	11.09.2026

Python Code:

```
name = input("What is your name? ")

print("Hello", name, "! I am your chatbot.")
print("You can ask me about Python, my purpose, or say hello/bye.")

while True:
    message = input("You: ").lower().strip()

    if "hello" in message or "hi" in message:
        print("Bot: Hello", name, "! Nice to meet you.")

    elif "how are you" in message:
        print("Bot: I am doing great! How are you?")

    elif "what is python" in message:
        print("Bot: Python is a popular programming language.")

    elif "what can you do" in message:
        print("Bot: I can answer simple questions using predefined rules.")

    elif "who are you" in message:
        print("Bot: I am a simple rule-based chatbot.")

    elif message == "bye" or message == "exit":
        print("Bot: Goodbye", name, "!")
```

break

else:

```
print("Bot: Sorry, I don't understand that. Please try another question.")
```

Output:

The screenshot shows a Google Colab notebook titled "Untitled5.ipynb". The code in the first cell is as follows:

```
[1] ✓ 3m
name = input("what is your name? ")
print("Hello", name, "I I am your chatbot.")
print("You can ask me about Python, my purpose, or say hello/bye.")

while True:
    message = input("You: ").lower().strip()

    if "hello" in message or "hi" in message:
        print("Bot: Hello", name, "I Nice to meet you.")

    elif "how are you" in message:
        print("Bot: I am doing great! How are you?")

    elif "what is python" in message:
        print("Bot: Python is a popular programming language.")

    elif "what can you do" in message:
        print("Bot: I can answer simple questions using predefined rules.")

    elif "who are you" in message:
        print("Bot: I am a simple rule-based chatbot.")

    elif message == "bye" or message == "exit":
        print("Bot: Goodbye", name, "I")
```

The screenshot shows the same Google Colab notebook, but with the code updated to include an else clause and the output of the chatbot. The code is:

```
[1] ✓ 3m
elif "who are you" in message:
    print("Bot: I am a simple rule-based chatbot.")

elif message == "bye" or message == "exit":
    print("Bot: Goodbye", name, "I")
    break

else:
    print("Bot: Sorry, I don't understand that. Please try another question.")
```

The output of the chatbot is shown in the second cell:

```
...
What is your name? Mariselvi
Hello Mariselvi ! I am your chatbot.
You can ask me about Python, my purpose, or say hello/bye.
You: hello
Bot: Hello Mariselvi ! Nice to meet you.
You: Hello
Bot: Hello Mariselvi ! Nice to meet you.
You: hi
Bot: Hello Mariselvi ! Nice to meet you.
You: how are you
Bot: I am doing great! How are you?
You: cskd
Bot: Sorry, I don't understand that. Please try another question.
You: bye
Bot: Goodbye Mariselvi !
```
